

iATS Payments launches **Brickwork version 4.5013!**

New Features included in Version 4.5013

- Record Type Integration now available for NPSP Recurring Donation's using value "rertid". [Download](#) an updated copy of the Brickwork User Guide, page 36 for more details.
- Ability to edit the Expiry Date field separately from the Credit Card number now available for the Recurring Donations iATS button virtual terminal.
- iATS button virtual terminals now prevent double-clicking
- "iATS Account" tab has been renamed as "iATS Merchant Account"
- Various other updates and bug fixes

Action Items

- If you have integrated Brickwork with the **Nonprofit Starter Pack's Recurring Donation** object, a new version (1.6) of our Extension has been released. This needs to be manually updated by [clicking here](#), and following the Salesforce Update Wizard.

Push Update Installation Information

- **Version 4.5013 has been automatically pushed to all 4.5011 users.**
- To confirm if you are now using the most up to date version, please visit the Salesforce **Setup** menu and locate the **App Setup** sub-menu, and click on the **Installed Packages** link. You will be able to see the version number beside iATS Payments.
- If you are using an older version and wish to take advantage of our new features and improvements, please visit the [Salesforce AppExchange](#) and update to Brickwork Version 4.5013 by clicking "[Get it Now](#)".
