
Brickwork Release Notes

New Brickwork Release – Feb 2020

Brickwork release 5.30

Included in this release are the following new features & various 'bug' fixes:

- 'IP Address' of sender is included in the Aura to Brickwork error emails
- Any posts to Brickwork that are of the incorrect format are simply disregarded. This was implemented to avoid an issue in which clients were receiving spam posts and subsequent error emails.
- Corrects issue in which the 'iATS Item label 1 - iATS Item label 6' fields on the Recurring Donation object were incorrectly be mapped.

Action Items

No action is required on your part to complete the upgrade to Version 5.30.

Version 5.30 installation links if you would like to complete the upgrade sooner:

Important Notice

With the upcoming Security Update and enforcement of the *Secure Guest Users' Org-Wide Defaults & Sharing Model* on March 1, 2020, iATS wanted to make all of our Brickwork clients aware that both version 5.24 &

version 5.30 are fully functional with the 'Secure Guest User Record Access' setting enabled.

You can test this by enabling the **Secure Guest User Record Access Setting** that is part of the Winter '20 Release. Please see steps below:

- From Setup Menu, enter Sharing Settings in the Quick Find box, & select Sharing Settings.
- Select Secure Guest User Record Access.
